

The Steps I've Taken To Set Up My Developer Environment.

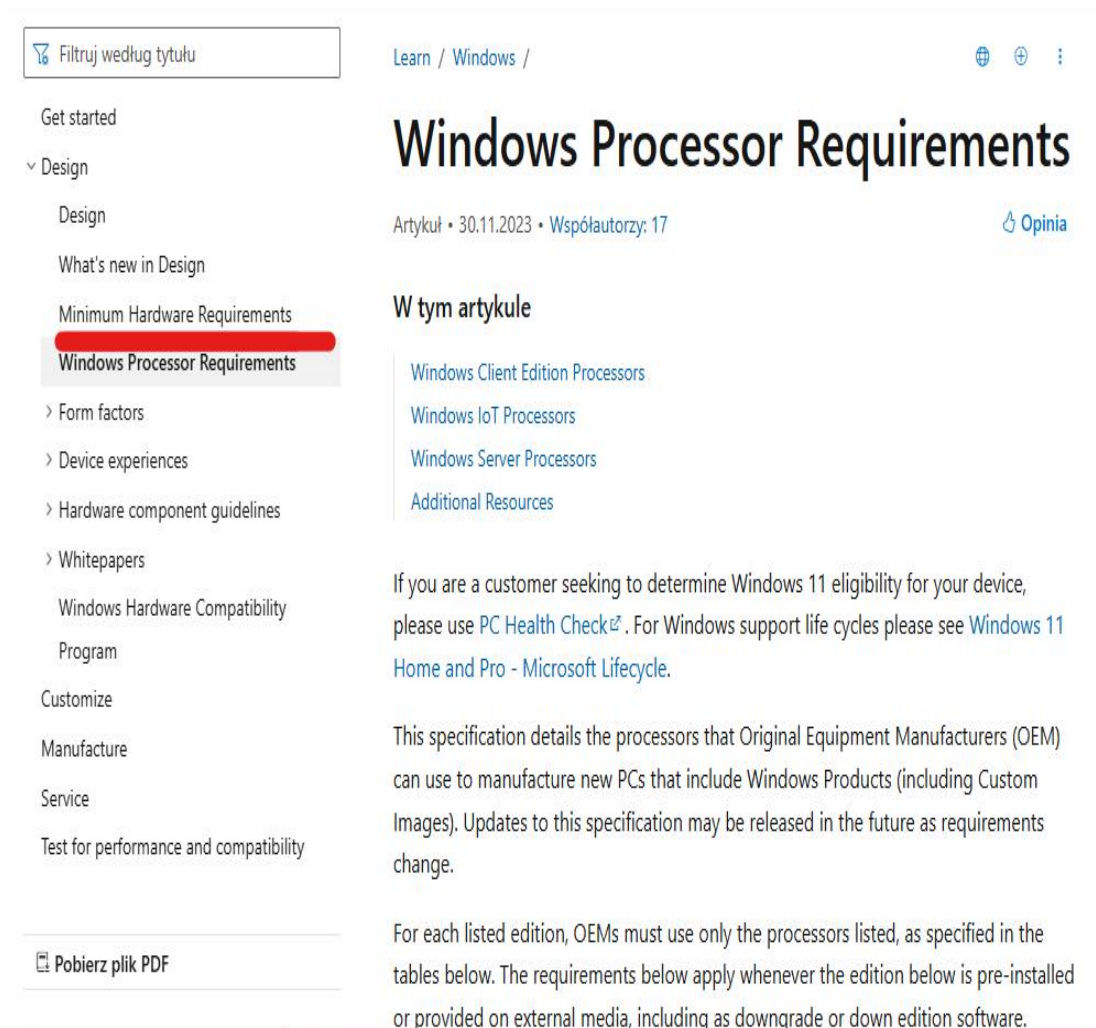

Your Operating System (OS)

Step 1: Download Windows 11

- Went to <https://www.microsoft.com/software-download/windows11>
- Before installing, I referred to the PC Health Check app to confirm if my device meets the minimum system requirements for Windows 11.

- I learnt that my PC does not meet the Windows 11 system requirement.
- Clicked "Learn More" then...

This PC will not run Windows 11

Your PC does not meet the needed requirements. Windows 10 will be supported until 14 October 2025, but you can also explore new PCs that will run Windows 11.¹²

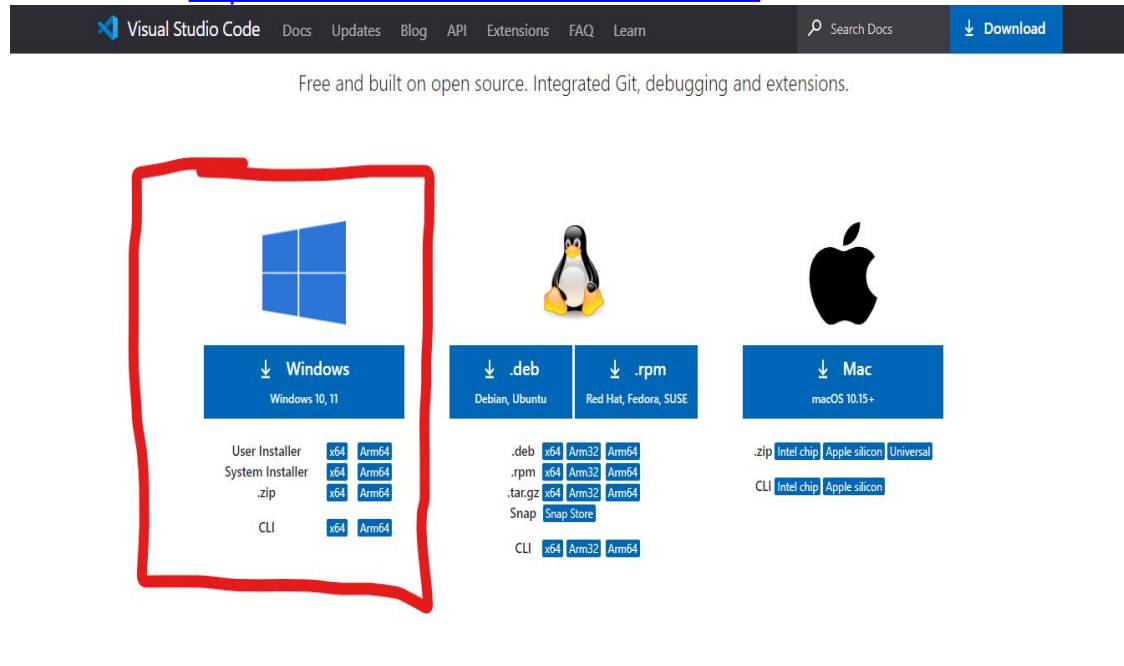

See Windows 11 system requirements > **Shop new PCs** >

Visual Studio Code.

Step 1: Download Visual Studio Code.

- Went to <https://code.visualstudio.com/Download>

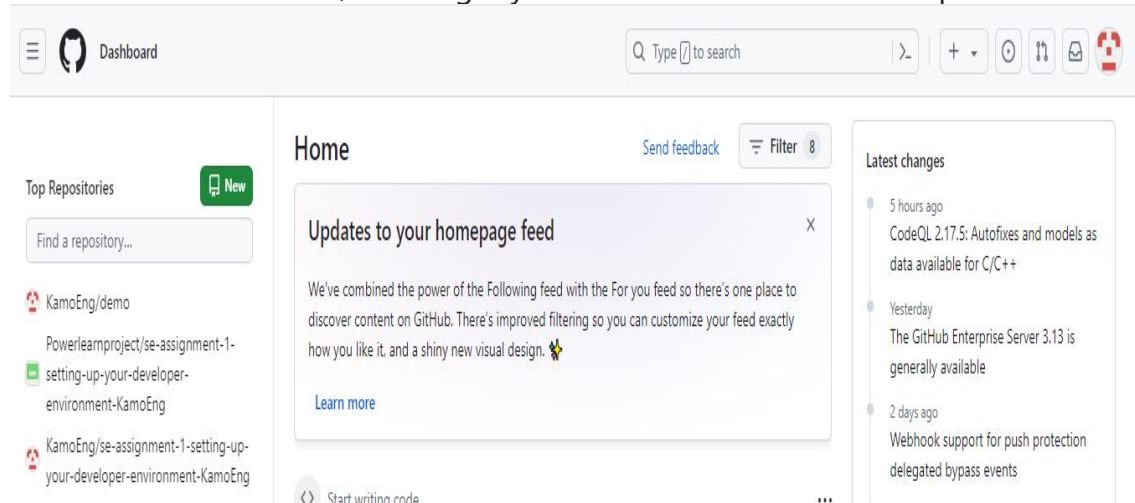

- When it was done downloading, I then installed
- I then set it up using the guideline provided at above given link.

GitHub

Step 1: Download GitHub

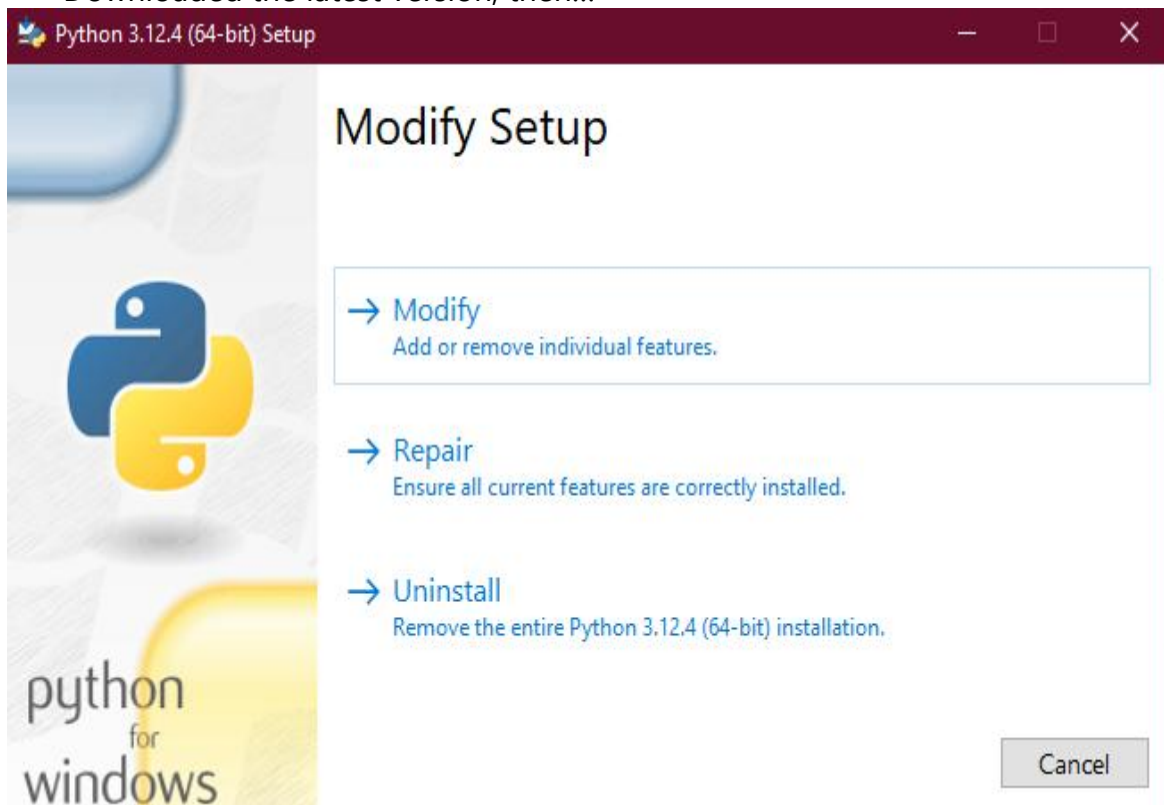

- Went to <https://github.com>
- Created an account, entering my email address and created a password.

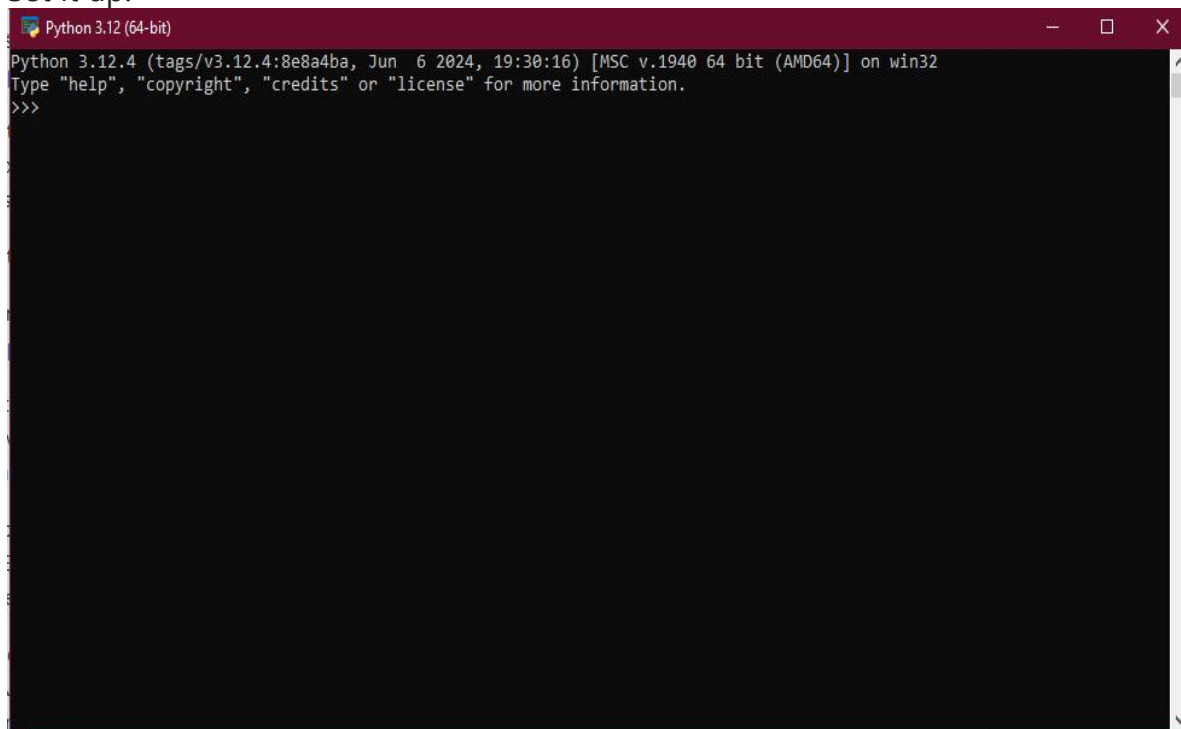

Python

Step download: Python

- Went to <http://www.python.org>
- Downloaded the latest version, then...

Set it up.

Its all system Go.

MySQL

Step 1: Download MySQL

- Went to <https://dev.mysql.com/downloads/windows/installer/5.7.html>
- Downloaded the latest version

Select Version:

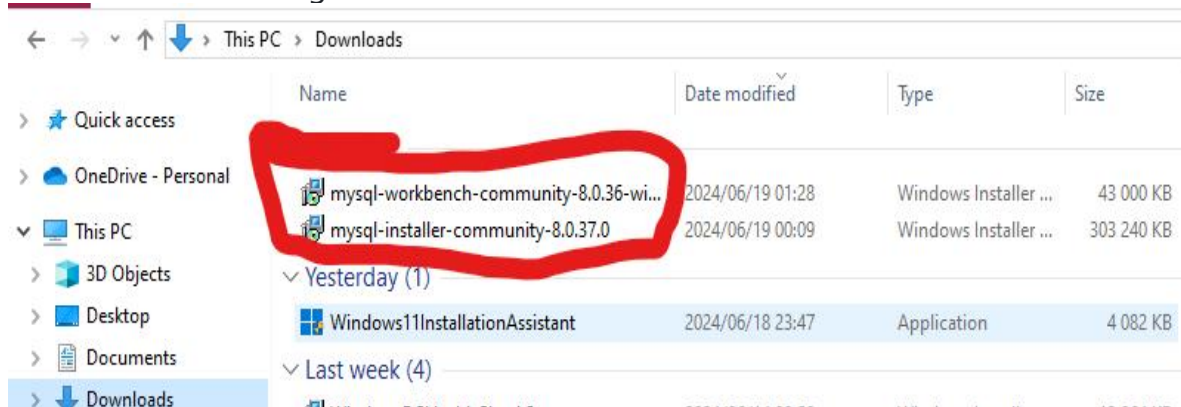

8.0.37

Select Operating System:

Microsoft Windows

Windows (x86, 32-bit), MSI Installer	8.0.37	2.1M	Download
(mysql-installer-web-community-8.0.37.0.msi) MD5: 398f1365f2bd43af9f6ece9add565c1b Signature			
Windows (x86, 32-bit), MSI Installer	8.0.37	296.1M	Download
(mysql-installer-community-8.0.37.0.msi) MD5: ae605e4f62aaf8bb1adef684d62a49f2 Signature			

- After downloading, I then checked where its located

- Then set it up
